

Direct Access Testing

What is Direct Access Testing?

Direct Access Testing allows St. Croix Health patients to order their own laboratory tests. It allows individuals who may want to learn more about their health without large out-of-pocket expenses. You are able to request specific laboratory tests without a provider's orders or insurance involvement.

What do you need to know?

- A provider's order is not required.
- No appointment is necessary.
- Anyone under the age of 18 must be accompanied by a parent/guardian.
- ***You must pay for the tests in advance by cash, check, or most credit cards; your insurance will not be billed.***
- You must have been seen as a patient by a St. Croix Health provider within the last 18 months.
- A picture ID is required at time of service.
- Results will be available in MyChart and can also be requested through the Release of Information Department by calling 800.828.3627.
- Direct Access Testing is available Monday through Friday from 8:00AM - 4:00PM at any St. Croix Health clinic. ***Please note that laboratory locations are closed from 12:00PM - 1:00PM daily.***
- It is encouraged to follow up with your provider regarding your results, but it is your decision.
- When you arrive at the clinic, check in at registration and ask for ***Direct Access Testing***.
